PUBLIC-SITE ACCESSIBILITY · TITLE II EVIDENCE

Sample city

This pack looks at public pages and public PDFs on the city's website for accessibility. Dated file for the Title II record. Not a conformance stamp.

HOW TO USE THIS FILE

01 Attach pages 1–2 to the council packet.

02 Forward the ticket list and the workbook to the website vendor.

03 Keep this dated file with the Title II record.

> Prepared for Sample city, its staff, its website vendor, and its Title II file. ActaPack does not publish this pack. City records rules still apply. This is not legal advice and does not certify WCAG conformance.

SITE www.samplecity.example	**POPULATION BAND** Under 50,000
WEBSITE SOFTWARE None we could name	**TITLE II DEADLINE** 26 April 2028
PACK DATE 19 September 2026	**RUN ID** local-sample-city-2026-09-19

SCOPE

Hostname looks CivicPlus; page files look like Drupal. We did not guess. We did not look at 28 sign-in page(s). Repeating PDF problems share a ticket (48 files on tickets of 79 in-scope PDFs).

250	80	1	28
HTML PAGES SAMPLED	PDFS INVENTORIED	PDFS LISTED HASH-ONLY	BLOCKED URLS

Listed only. Looks like archived or preexisting material not currently used to apply for or participate in a service. City attorney owns the exception call. See the 1 listed PDFs

Out of scope: intranet, LMS, payment vendors, authenticated portals.

WHAT ELSE WE SAW

- Public pages load DocAccess, an HTML transcript of PDFs. That is not the same as fixing the PDF itself.
- Public pages load AudioEye. A toolbar or overlay is not WCAG of the page content.
- We found an accessibility or ADA grievance page. Keep it current; we did not judge the procedure.
- A city-meeting video page is in this sample. Automated checks cannot confirm captions — a person still has to listen.

CHANGE SINCE LAST PACK

172 new, 0 fixed, 10 regressed.

CRITICAL

Text contrast is too low to read · T-1140

> In the link “Adobe Reader”

https://www.samplecity.example/AgendaCenter

WHAT WE SAW

Text is too light against the background for many people to read. The failing region is the link “Adobe Reader”. Measured contrast is about 4.3 to 1 (too light to read comfortably). Text is about #318597 on #ffffff.

WHY IT MATTERS

If residents cannot read the words, they cannot use that page.

IN THE PAGE MARKUP · T-1140

```
<div class="header selfClear">
  <div class="text">
    <a
href="http://www.adobe.com/products/acrobat/readstep2.html" target="_self">Adobe Reader</a>
  </div>
</div>
```

WHAT'S PAINTING THIS · T-1140 ALREADY CLOSE

- **TEXT #318597**
  .moduleContentNew a:link
  356170325.css
- **BACKGROUND #ffffff**
  #mainWrapTS
  356170325.css

These paints would reach 4.5 to 1 contrast between the text and the background. That is the ratio we measure.

NOW — THEN about 4.7 to 1 contrast

Aa — Aa Darken the text to #2f7e8f

What to do on the website · T-1140

This color comes from a shared stylesheet — fix it once in the header or template, not page by page.

1. This color is set in 356170325.css, not on that one page.
2. Ask the website vendor to change the text color to #2f7e8f or darker.
3. Publish, then reopen the page to confirm it stuck.

CRITICAL

Text contrast is too low to read · T-FE42

DOCUMENT	PATH
Regularly Scheduled Meetings of Council Appointed Commissions and Boards	/DocumentCenter/View/420/Regularly-Scheduled-Meetings-of-Council-Appointed-Commissions-and-Boards-PDF

Method

We ran automated checks on a sample of public HTML pages and on public PDFs we could download. When a PDF is a scanned image, we may read it as text when the month’s budget allows. Software cannot test every WCAG 2.1 AA requirement. Industry research suggests only about 16 of 50 WCAG 2.1 AA success criteria can be fully checked without human review, so many problems still need manual testing. We did not run a screen reader or walk the site with the keyboard only. This pack lists what we found on the pages we checked. It is not a full conformance audit and does not certify WCAG.
